

Mini Challenge 2: Industrialization

Authors

- Mudit Bhargava (mbhargava@umass.edu)
- Priyadarshi Rath (priyadarshir@umass.edu)

Bokeh Version - 0.12.7

Command to run python file
bokeh serve --show MC2.py

Startup Time - 7 seconds

To note - Some amount of pre-processing has been done to keep the startup time low. The preprocessed data is stored as pickle files and loaded at run time. Below are the pickle files being used

- Counts.pickle - A 3-d array that stores the number of readings for a particular chemical and particular sensor.
- Readings.pickle - A 3-d array that stores the actual chemical readings for each sensor and chemical.
